

To Whom It May Concern:

I am an application developer with a master's degree in electrical engineering, specializing in Mobile embedded systems. Currently, I served as a React Developer at Rumble On, where I build applications for both web and mobile platforms using state-of-the-art technologies and industry standards. Over the years, I've persevered through numerous challenges including multiple management changes, the global impact of COVID-19, and several rounds of layoffs. Unfortunately, during the most recent restructuring, where key roles like the CTO, Architect, Technical ID Director, and VP of IT were affected, the company opted to significantly reduce its IT investments, leading to my current search for a new opportunity.

In my tenure at Rumble On, I've acquired proficiency in Javascript, Typescript, and GraphQL, and have developed for both Android and iOS platforms. When the need for cross-platform development arose, I seamlessly transitioned to working with React. Over the past four years, my commitment to continuous learning has earned me the title of a "quick learner" from my colleagues.

I played a pivotal role as a Project Manager for the Classifieds project, overseeing responsibilities that spanned from maintaining Jira, creating tickets, gathering business requirements, and translating them into technical specifications for the development team. My role also involved writing and updating technical documents, coordinating with a team of 24 developers offshore from India and Sri Lanka, and ensuring the smooth execution of sprints from planning to launch. Furthermore, I actively participated in daily standups, obstacle identification, collaborative problem-solving, compliance artifact management, code reviews, and buddy testing.

As I am currently under an H1-B visa, any potential role change would require a transfer of this visa. I'd appreciate a discussion regarding this and any prospective job opportunities you might have.

I'm available for conversations:

- Mon - Fri: 8am - 12am, 1pm - 4pm, and from 5pm CST onwards.
- For timings outside the mentioned window, please text me in advance so I can make the necessary arrangements.

Thank you for considering my application. I look forward to the possibility of contributing to your team.

Stay safe and healthy,

Ameya Shetye.
